

CORE SKILLS

Design Systems Governance & Release Management

Component Libraries (Variants & Properties)

Design Tokens & Multi-brand Theming

Interactive Prototyping (Figma, ProtoPie, Claude Code)

Accessibility & Inclusive Design (WCAG 2.2/3.0)

Reusable Patterns & Documentation

Cross-platform UI (Web, iOS, Android)

Cross-functional Leadership

TOOLS

Figma
UI design, prototyping

Tokens Studio
Token source of truth

Style Dictionary
Token build pipeline

Storybook
Frontend workshop

Git
Version control

Claude Code
AI-assisted development

ProtoPie
Prototyping

Webflow
CMS, prototyping

Jira
Project management

After Effects
Video & animation

Lottie

Summary

Design systems for Yubico, Stanford Medicine, and Hewlett Packard Enterprise. I build the component libraries and token pipelines (Figma → Storybook/NPM) that let teams ship consistent, accessible product at scale — one design change propagating to six platforms with zero manual steps.

8+ years in complex B2B SaaS: the five-product unification at Yubico reclaimed \$3M+ annually. Lately, AI workflows that turn structured brand and product data into production-ready output.

Experience

Principal Product Designer, Design Systems

Yubico, Stanford Medicine, Hewlett Packard Enterprise, WebMocha, Digital Pop
Mar 2024 – Present · Los Angeles, United States

Design systems consulting for enterprise clients:

- Set up Figma multi-context variables so components are designed once and themed per brand, size, and platform — asset preparation now runs 75% faster.
- Built design token pipelines (Figma → Tokens Studio → Style Dictionary → Storybook/NPM) so code consumes the same tokens designers edit; QA effort dropped 40–60%.
- Rebuilt a marketing site on a component-driven system. Page lead times went from ~3 days to under 2 hours.
- Wrote the design system documentation and set up governance, versioning, and release management for client component libraries.
- Built AI workflows that generate design and documentation output straight from structured brand and product data.

Yubico

4 yrs 7 mos

Principal Product Designer

Full-time · Jan 2021 – Feb 2024 · 3 yrs 2 mos
Stockholm, Sweden

Led multi-million-dollar SaaS initiatives across Yubico's enterprise security products:

- Unified 5 products spread across six codebases (WordPress+React, Svelte+Tailwind, MUI, docs, email, mobile) under one design system — ~80% less UI rework, \$3M+ reclaimed annually.
- Designed enterprise features end to end — concept, interactive Figma prototypes, validation, implementation — working across three engineering teams with PMs and technical writers.
- Integrated design tokens with MUI, cutting engineering effort on UI work ~30%.
- Built accessibility into the token and component layer — WCAG 2.2 compliance across every platform, 25% less rework.
- Coached designers on working in the system; adoption and consistency rose 40% across teams.

UX Designer

Full-time · Aug 2019 – Jan 2021 · 1 yr 6 mos
Stockholm, Sweden

Created Yubico's first enterprise design system, replacing fragmented legacy design processes with a unified framework. Brought stakeholders from every product team onto the shared framework, cut design debt, and laid the foundation the 2021 five-product unification was built on.

FIDO UX Working Group Member

FIDO Alliance · Aug 2022 – Jan 2024

Workshop Facilitator / Agile Transformation

Agile Extreme — Europe's #1 Agile Transformation Partner · Jan 2019 – Aug 2019

Certificates

Certified SAFe® 5 Product Owner/Product Manager
Scaled Agile, Inc.
Issued Oct 2022

Advanced 2D Animation
School of Motion
Issued Sep 2022

Universities

Edith Cowan University
B.A. in Media & Communications
2017 – 2019

Berghs
Bachelor, Communication Strategy
2016
